September 21, 1990

Mr. Chris Chapel, Scheduler
BMW Constructors, Inc.
P. O. Box 1686
Calumet, IL 60409

Dear Mr. Chapel:

Approximately four months ago, Quantum Management asked us to design and build a unit to clean up the Ethylene Unit Wastewater and to have it in operation by September 25, 1990.

We started building early, even before the drawings were done. This naturally caused problems and errors. We corrected our errors, solved our problems and most of all we pulled together. To make a long story short, with lots of help from you and your associates, we achieved mechanical completion on September 12, 1990.

Your part in this project was essential to its success and I want you to know how much it is appreciated by not only me, but by the entire Quantum Management.

Cooperation and hard work make the difference between success and failure of a project. Continuing successful projects make successful businesses and prosperous companies.

Thank you so much for your "above and beyond the call of duty" efforts.

*Chris,
Thanks for all
your help &
hard work.*

Sincerely yours,

Keith
