

Warsaw Financial Center

Warsaw, Poland
538,196 SF

The Warsaw Financial Center is the first state-of-the-art, high-rise office building in Poland. The new facility accommodates offices for the National Bank of Poland, as well as numerous other tenants.

On the ground floor, there are separate lobbies for the National Bank and the remainder of the office tower. A public plaza and landscaped sidewalks further enliven this level.

The penthouse crown and spire, 130m high, create a dynamic signature for the National Bank on the historic Warsaw skyline.
